

Please click on setting tab at the top to bring the screen below :

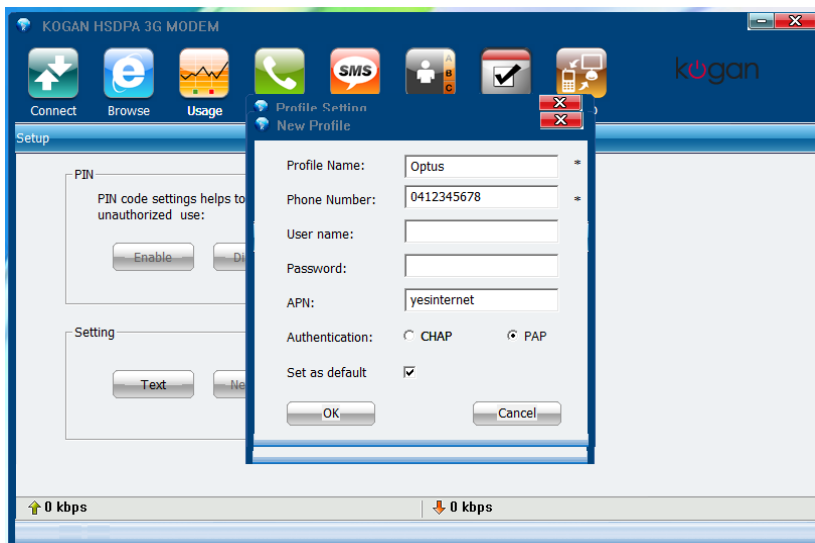

Please click on “Profiles” button which is highlighted in above image.

It will bring the pop box shown below. Please click on “New” button.

Fill your 3G internet provider's details as shown in the box below and press ok.

You can find this information here: <http://ausdroid.net/apns/>

You need to leave username and password field empty.

It then take you back to the previous screen. Click on Save and exit the program.

Then restart the program and follow the prompts.

You should be able to use 3G internet with your Kogan modem.
