QUALITY PURCHASE**
WITH THIS NEW GROOMING TOOL.

WE KNOW YOU'VE GOT THIS, BUT BEFORE YOU JUMP INTO
USING YOUR NEW SIDE KICK, HERE'S A FEW TIPS & TRICKS
TO KNOW BEFORE LETTING YOUR CREATIVITY RUN LOOSE.

HIT UP **VIFORMEN.COM.AU** FOR MORE GROOMING & INSPIRATION.

THE MASTER TRIM

BRAVO. YOU'VE MADE A QUALITY PURCHASE.

The Master Trim is the lithium powered beard trimmer with power, precision & performance in the palm of your hand.

1. Precision W-Tech blades
2. Lithium-ion power
3. 34mm wide trimming blade
4. 1 comb guide with 15 positions (1mm to 15mm)
5. Integrated grooved wheel control adjusts trimming settings
6. Lock system maintains the length setting to guarantee an even cut
7. Cordless use
8. Charging stand
9. Cleaning brush
10. Oil

PREPPING YOUR NEW TOOL

CHARGING

The Master Trim is so easy to use. But before you start using your new tool, you must take the time to charge it overnight for 3 hours before its first use. Your new tool comes with a small amount of charge, but the initial charge will ensure your new tool will have optimum power performance to give you smooth fast cutting, every time.

- Before using for the first time, fully charge your new tool continuously for 3 hours. After the first charge a full charge will only take 90 minutes.
- Maximum battery capacity will only be reached after 3 charging & discharging cycles.
- Ensure your new tool is switched off.
- Insert the small plug on the charging adaptor into the socket on the bottom of your new tool.
- Plug the charging adaptor into a suitable mains power socket and switch on.
- The blue charging LED indicator light on your new tool will flash when correctly connected to the mains power. When it is fully charged, the blue charging LED indicator light will remain on.
- A full charge will take 90 minutes and will supply 60 minutes cordless runtime.
- A quick charge of 5 minutes will supply 3 minutes cordless runtime, sufficient for a single beard trim.
- To maintain optimum capacity of the rechargeable battery, it is highly recommended to fully discharge & then recharge your tool for 3 hours every 3 months.

HOW TO USE THE MASTER TRIM

BEFORE USING

- Always inspect the trimmer blades for noticeable signs of damage.
- Always inspect the trimmer blades before use to ensure they are free from hair, debris etc.
- Ensure the trimmer is sufficiently charged before use.
- For best performance use on clean, dry hair that has been combed until tangle-free.

SELECTING A CUTTING LENGTH

Your Master Trim comes with 1 comb guide with 15 positions (1mm to 15mm) for keeping your beard in top shape and an integrated grooved wheel control that adjusts the trimming settings in 1mm steps. Simply turn the wheel up and down to your desired cutting length setting.

The cutting lengths are displayed on the LED screen in 'mm'. The length setting on the LED screen will change as you adjust the grooved wheel control.

GOOD TO NOTE: Always put the comb guide on BEFORE turning the trimmer on, and turn the trimmer off before removing it.

To remove the cutting guide, first adjust the cutting length to maximum (15 mm). With the trimmer switched off, slowly pull the comb guide upwards and away from the trimmer body to remove.

To replace the cutting guide, first adjust the cutting length to minimum (1 mm). With the trimmer switched off, clip on one side and then the other side of the comb guide.

Use the grooved wheel to select the desired cutting length.

USING THE LENGTH LOCK SYSTEM

The length-lock system ensures the comb guide does not slip in use and securely maintains your chosen length setting to guarantee an even cut.

Once you have chosen your desired cutting length you can activate the length-lock system.

To lock the selected length in place press the button underneath the grooved wheel control until the lock symbol appears. An LED with the  symbol should appear.

To unlock the length control wheel, press the button underneath the wheel control until the lock symbol disappears and the unlock LED illuminates with the  symbol appears.

IMPORTANT: Do not force the wheel length control to adjust settings or apply unnecessary pressure to the comb guide when the switch is set to the length lock position as this may cause damage to the trimmer.

TRAVEL LOCK FEATURE

Your Master Trim comes with a travel lock feature which will lock the on/off button from turning on accidentally.

To activate the travel lock, press and hold the on/off button for 3 seconds until a green lock symbol appears. After 3 seconds the green symbol will disappear however the trimmer will stay locked.

If you press the on/off button for less than 3 seconds the travel lock symbol will appear and flash and the trimmer will not turn on.

To de-activate the travel lock, press and hold the on/off button for 3 seconds, the trimmer will then switch on. The travel lock is now deactivated.

When you place the unit in the charger, the travel lock is automatically deactivated.

TRIMMING TIPS

Hit up www.vsformen.com.au for more grooming tips & inspiration.

USING THE TRIMMING BLADES + COMB GUIDE

1. Switch the trimmer on by pressing the On/Off button.
2. Select your desired cutting length. To adjust the cutting length of your trimmer, simply turn the wheel up and down (clockwise and anti-clockwise) to your desired cutting length setting.
3. When trimming, hold the comb guide flat against the skin. For the most precise, consistent trim, the tips of the teeth and the little corners protruding from the comb should always be in contact with the skin. If not, the precision of the cut may change. (Fig. 1-2).
4. It is suggested to trim the hair in the direction of hair growth, as trimming against the direction of growth could cause a rash or irritation.
5. Pull the skin firmly with one hand during the trimming process to ensure the closest trim possible.
6. Move the trimmer slowly and carefully, so as not to cut any hair you do not intend to trim.
7. Trim, shape and define your facial hair as needed.

Fig. 1

Fig. 2

BE CAREFUL NOT TO APPLY EXCESS PRESSURE TO THE BLADE, AS THIS MAY DAMAGE THE BLADE AND CAN RESULT IN INJURY TO THE SKIN DURING TRIMMING.

TRIMMER CLEANING & MAINTENANCE

Because the trimmer blades are precision made for a very special use, they should always be handled with care. To ensure long-lasting performance of your trimmer, it is important to clean the blades + the comb guide after every use.

The blades are washable for easy cleaning.

To remove the trimming blade, make sure that the trimmer is switched off and the cutting comb guide is removed. Hold the trimmer with the blades pointing up and remove them by pressing their points.

To clean the blades:

1. First, take a small brush and brush away any loose hairs that have collected in the blades.
2. Rinse the trimming blades under running water. The comb guide can also be rinsed separately.
3. After cleaning, make sure to shake off excess water and dry the head of the trimming blades + comb guide before replacing onto the handle.

After rinsing the blades, they will need to be re-oiled.

Using the oil supplied with your new tool, unscrew the cap & cut off the very end of the plastic tube with a pair of scissors to release the oil.

Switch your tool on, gently squeeze the oil tube & apply 2 drops of oil onto the blades. Leave the tool on for a further few seconds to allow the oil to thoroughly spread across each of the blades. Switch off the tool & remove any excess oil by gently dabbing with a cloth.

GOOD TO NOTE: BEFORE RE-ATTACHING THE BLADES TO THE TRIMMER, ENSURE THEY ARE DRY AND THE MOVING BLADE IS IN THE CENTRE (FIG. 3)

Fig. 3

WORLDWIDE VOLTAGE

This appliance has a multi voltage feature for worldwide use. The voltage automatically converts for ease of use from 100v - 240v. This appliance has an automatic internal converter which will automatically convert the voltage without the need of a switch. A suitable plug adaptor will be required, please refer to the chart below.

Plug adaptor required	Voltage and plug adaptors	Country	Voltage setting
	British plug: 240V	Ireland, Great Britain, Singapore, South America, Hong Kong (parts only), Africa (parts only)	240V
	European plug: 240V	Asia, Europe, Middle East Noumea, Scandinavia, South America, Hong Kong (parts only)	240V
	Australian and New Zealand plug: 240V	Australia, New Zealand	240V
	American plugs: 120V	North America, Japan, Canada (parts of)	120V

BATTERY DISPOSAL

The Master Trim contains a Li-ion battery. To protect the environment, the appliance must be disposed of safely at the end of its useful life.

LI-ION

Please take the appliance to a recycling centre, where the internal rechargeable battery should be removed by a professional and recycled separately.

For more information about the recycling of electrical and battery operated appliances, please contact your local council office or your household waste disposal service.

LIMITED THREE YEAR WARRANTY

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure. In New Zealand our goods come with a guarantee that cannot be excluded under the Consumer Guarantee Act 1993.

Conair Australia Pty Ltd. will repair or replace (at our option) your appliance free of charge for thirty-six months from the date of purchase if the appliance is defective in workmanship or materials.

This warranty is an additional benefit and does not affect your legal rights. To obtain service under this warranty, please read the Warranty Leaflet included or contact Conair Customer Service at aus_info@conair.com.

**TO MAKE A WARRANTY CLAIM YOU MUST
RETAIN YOUR PROOF OF PURCHASE.**

IMPORTANT SAFETY INSTRUCTIONS

When using electrical appliances, especially when children are present, basic safety instructions should always be followed, including the following:

Polythene bags over product or package may be dangerous. To avoid danger of suffocation, keep this wrapper away from babies and children. This bag is not a toy.

DANGER: When the unit is used in a bathroom, unplug it after use since the proximity of water presents a hazard even when the appliance is switched off

WARNING: Do not use or leave the AC power adaptor in a position where it can become wet or there is a danger of it falling into a basin or other vessels containing water. Keep the appliance dry, unless it otherwise specified. Do not use this appliance in or near bathtubs, showers, basins or other vessels containing water.

- Do not immerse appliance in water or other liquids.
- Do not reach for an appliance that has fallen into water. Unplug immediately.
- Take care to avoid contact between the moving blades of the unit and the skin, paying particular attention to the face, neck and hands.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.

IMPORTANT: Always unplug the appliance when not in use or before cleaning. Do not leave unattended when plugged in or switched on. Do not place on any heat sensitive surface.

- Do not use any attachments other than those supplied by Conair Australia Pty Ltd.
- Use this appliance only for its intended use as described within this instruction booklet.
- Always unplug the appliance when fully charged.
- This appliance is not intended for commercial use.
- Never drop or insert any object into an opening.
- Do not use the appliance with damaged or broken attachment combs or with any teeth missing from the blades, as injury may occur.
- Do not place on any surface while it is operating.
- Keep the cord away from heated surfaces
- Never twist or pull on the power cord.
- Do not use an extension cord with this appliance.
- After use do not wrap the cord around the appliance as in time this may cause the cord to fracture. Coil cord loosely by the side of the appliance in storage.
- Do not use outdoors or operate where aerosol (spray) products are being used or where oxygen is being administered.
- Do not use the appliance if it is damaged. In the event of damage, discontinue use immediately and contact your dealer for instructions on returning it for examination or exchange. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified person in order to avoid a hazard.
- Always ensure that the voltage to be used corresponds to the voltage marked on the unit.
- For additional protection, the installation of a residual current device (RCD) with a rated operating current not exceeding 30mA is advisable in the electrical current circuit supplying the bathroom. Ask your installer for advice.
