

# CTHSE10RELA

## Certa 10m Retractable Garden Hose Reel

### Quick Start Guide

## Safety & Warnings

- Read all instructions before using the appliance and retain for reference.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

## Parts

		
Hose wheel + bracket	Spray nozzle	Masonry anchors + bolts

## Installation

- 1) Choose a suitable position on your wall. Mark and drill 2x8mm holes to correspond with the positions of the holes in the wall bracket. Ensure the hole's size is suitable for the masonry anchors included. Position as per Image 1.
- 2) Install the masonry anchors and bolts into the wall as per Image 2.
- 3) Attach the short connecting hose from the hose reel body to the tap as per Image 3. Once you turn on your tap, the water will flow through this hose, through the hose reel to the spray nozzle. You can regulate the water flow by twisting the end of the spray nozzle.

## Operation

This hose reel system has been equipped with a click-lock mechanism. To operate, pull the hose out to the desired length. When you stop pulling, the hose will automatically stop. To engage the automatic hose recoil, give it a short, sharp pull and the hose will automatically retract.

You can interrupt this process by pulling the hose again. In order to retract the hose safely, ensure you keep hold of the hose end while walking towards the hose reel. Letting go of the hose may result in injury.

## Maintenance

- Always keep the hose clean after use.
- It is recommended to turn off the water flow at your garden tap before retracting the hose.
- When not in use for a long period, it is advisable to store your hose in a covered area.

## Specifications

Hose length	Hose material	Pressure	Inner Hose Diameter
10m	PVC	Max. 8Bar	5/16" (8mm)
