## First time use

For first time use we recommend charging your Smart Bangle for at least 2 hours, using the supplied USB charging clamp.

1. Plug the USB end of the cable into your laptop, PC or AC adapter.
2. On the underside of the Smart Bangle's face, you will notice two small contact points. Connect the charging clamp so the protruding pins connect with the contact points on the Smart Bangle.

## Pairing your Bluetooth Smart Bangle

Your Bluetooth Smart Bangle communicates with your smartphone via Bluetooth. Before starting make sure Bluetooth is enabled and ready to search for devices. For information on how to do this please consult your smartphone's user manual.

1. Press and hold Button 2 until you see the text "paring..." appear on the display.
2. The Smart Bangle should now appear in available Bluetooth devices on your smartphone. You may need to tell your smartphone to "scan" for new devices once step 1 is complete.
3. Select the Smart Bangle device from your Bluetooth devices list on your smartphone.
4. If the devices pair successfully, your smartphones device name will appear on the Smart Bangle's display.

Your Smart Bangle will now vibrate and display caller ID when you have an incoming call.

## Configuring the clock

During normal operation the display of the Smart Bangle will be blank. To show the clock for a few seconds, press Button 1.

See the below steps for setting the time on the clock.

1. Press and hold Button 1 until the clock appears and starts flashing.
2. The first set of numbers you can change is the Hour. Press Button 2 to increment the hour.
3. Press Button 1 again to move to Minutes. Press Button 2 to increment the minute.
4. Finish configuring the clock by press Button 1 again.

*Note: The Smart Bangle works in 24 hour time only.*

## Using your Bluetooth Smart Bangle

Your Smart Bangle will notify you of any calls automatically.

If you plan on ignoring a phone call and want to mute the Smart Bangle's vibration function, simply press either Button 1 or Button 2. Caller ID will remain displayed for the duration of your smartphone's ring.
