9 Filler Funnel for Ground Coffee
12 Brew Unit
15 Milk Frother Control

Control Panel

Espresso
Americano
Cappuccino
Settings Menu

Latte
Hot Water
Milk Foam
Add Powder
Power
Important Safeguards

When using electrical appliances, basic safety precautions should always be followed, including the following:

1. Read all instructions
2. Do not touch hot surfaces. Use handles or knobs.
3. To protect against fire, electric shock and injury to persons do not immerse cord, plugs, or appliance in water or other liquid.
4. Close supervision is necessary when the appliance is used near children.
5. Unplug from power outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
6. Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact the Kogan customer support team for information.
7. The use of accessory attachments not recommended by Kogan.com may result in fire, electric shock or injury to persons.
8. Do not use outdoors.
9. Do not let cord hang over edge of table/counter, or touch hot surfaces.
10. Do not place on or near a hot gas or electric burner, or in a heated oven.
11. Always attach plug to appliance first, then plug cord into wall outlet. To disconnect, turn any control to “off”, then remove plug from wall outlet.
12. Do not use appliance for anything other than its intended use.
13. Save these instructions for future reference.

- This appliance is for household or commercial use only. Any servicing, other than cleaning and user maintenance, should be performed by the Kogan service center.
- Do not immerse machine in water.
- To reduce the risk of fire or electric shock, do not disassemble the machine. There are no parts inside the machine serviceable by the user. Repairs should be done by Kogan service technicians only.
- Check voltage to be sure that the voltage indicated on the nameplate corresponds with your voltage.
- Never use warm or hot water to fill the water tank. Use cold water only.
- Keep your hands and cord away from hot parts of the appliance during operation.
- Never clean with scrubbing powders or harsh cleaners. Simply use a soft damp cloth with water.
- For optimal taste of your coffee, use purified or bottled water. Periodic descaling is recommended every 2-3 months.
- Do not use caramelised or flavoured coffee beans.

Suitable locations

For best use, it is recommended that you:

- Choose a safe, level surface, where there will be no danger of overturning the appliance accidentally;
- Choose a location that is sufficiently well-it, clean and near an easily reachable power socket;
- While switching on or off the machine, we suggest placing an empty glass under the dispensing spout;
- Do not keep the machine at temperatures below 0 degree. Frost may damage the machine. Do not use the coffee machine outdoors. In order to prevent its housing from melting or being damaged, do not place the machine on very hot surfaces and close to open flames.
Cleaning and storing the machine

Keep the machine at its best by cleaning and storing it properly. Since the machine uses natural ingredients as brew beverages (coffee beans, water, milk, etc.), some residues of ground coffee or condensed water could be present on its supporting surface. For this reason we recommend to periodically clean both the visible parts of the machine and the area beneath it.

Before storing the machine we strongly recommend you thoroughly clean it. Water left in the tank and/or in the water circuit for several days should not be consumed. If the machine is going to remain inactive for a long time, dispense water as described in the “hot water” section.

Turn off the power button and clean the machine. Finally, remove the plug from the socket. Wait for the machine to cool down.

Never immerse the machine in water! Store it in a dry place, out of the reach of children. Keep it protected from dust and dirt. It is strictly forbidden to tamper with the internal parts of the machine.

Fire Safety Precaution

In the event of fire, use a carbon dioxide (Co2) extinguisher. Do not use water or dry powder extinguishers.

Preliminary Operations

• NEVER remove the drip tray when the machine is on. Wait for a couple of minutes after turning on/off, as the machine will be carrying out a rinse/self-cleaning cycle (see “rinse/self-cleaning cycle” section).
• Fill the tank only with fresh, non-sparkling water. Hot water or any other liquid may damage the tank and/or the machine. Do not operate the machine without water. Make sure there is enough water in the tank.
• Only coffee beans must be put into the coffee bean tank. Ground coffee, instant coffee or any other substance in the coffee bean tank may damage the machine.

Adjustable Coffee Grinders

Warning: the grinder adjustment knob, which is located inside the coffee bean tank, must be turned with the coffee grinder adjustment key only when the coffee grinder is working. Do not put any material other than coffee beans into the tank. Do not pour ground and/or instant coffee into the bean tank.

Warning: The coffee grinder contains moving parts that may be dangerous. Do not insert fingers and/or other objects into the grinder. In case of malfunction, turn off the appliance by pressing the power button and remove the plug from the socket before carrying out any other type of operation inside the coffee bean tank. Do not pour coffee beans into the tank while the coffee grinder is working.

Coffee Brewing using Coffee Powder

Warning: Add only coffee powder to the compartment. Other substances and objects may cause severe damage to the machine. Such damage will not be covered by warranty.

Hot Water Dispensing

Warning: At the beginning, short spurts of hot water may come out. There is a high risk of burning. The device may reach high temperatures so do not touch it with bare hands.

General Cleaning

Do not immerse the machine in water. Do not wash any of its parts in the dishwasher. Do not use sharp objects or harsh chemical products (solvents) for cleaning. Use a soft, dampened cloth to clean the machine. Do not dry the machine and/or its parts using a microwave and/or oven.
Brew Cleaning with Coffee Oil Remover

Warning: The coffee oil remover is to be used for cleaning only and does not have a descaling function. For descaling, use descaling solution and follow the procedure described in the "descaling" chapter.

Descaling

Not doing this will ultimately make your appliance stop working properly and such repair is not covered by warranty.

Warning: Never drink the descaling solution or any products dispensed until the cycle has been carried out to the end. Never use vinegar as a descaling solution.

Disposal

Do not dispose of electrical appliances as unsorted municipal waste, use separate collection facilities.
Contact your local government for information regarding the collection systems available.
If electrical appliances are disposed of in landfills or dumps, hazardous substances can leak into the groundwater and get into the food chain, damaging your health and well-being.

Usage

First installation

1. Unpack the machine;
2. Remove the water tank. Fill it with fresh drinking water;
3. Fill the coffee beans;
4. Insert the power plug into the wall socket.
5. Press the Kogan logo;
6. Allow the Machine to Warm up
7. The machine is now ready for use and will be in the Standby mode.
Making Americano

1. Adjust the height of the dispensing spout.
2. Press the Americano icon to brew Americano style coffee.

Making Espresso

1. Adjust the height of the dispensing spout.
2. Press the Espresso icon to brew espresso style coffee.

Making hot water

1. Place the cup below the dispensing spout.
2. Press the hot water icon. The machine will start to disperse hot water.
3. Once you have the desired amount of hot water, press the power icon to stop.
Making cappuccino
1. Insert the milk frother into the machine.
2. Place the milk hose into the milk (we recommend using whole milk).
3. Press the cappuccino icon. The machine will start to make a cappuccino.
4. Once you have your desired amount of milk, you can press the power icon to stop the process.

Making latte
1. Insert the milk frother into the machine.
2. Place the milk hose into the milk (we recommend using whole milk).
3. Press the latte icon. The machine will start to make a latte.
4. Once you have your desired amount of milk, you can press the power icon to stop the process.

Making hot milk/milk foam
1. Insert the milk frother into the machine.
2. Place the milk hose into the milk (we recommend using pure milk).
3. Press the milk icon, the machine will start to add the milk into your cup.
4. Once you have reached your desired amount of milk you can press the power icon to stop the process.
**Milk foam control**

Open the left-hand door and you will see the milk frother control. The quality of the milk foam will depend on the milk you use and the temperature of the milk. When frothing the milk, please ensure you turn the milk frother control counter-clockwise if it is not in the correct position and the milk is not frothing enough. If there is only steam coming out, please turn the milk frother control clockwise. Make sure you clean the milk frother device after use to avoid blockages.

**Adjusting coffee grinder**

The grinder adjustment knob, which is placed inside the coffee bean tank, must be turned with the coffee grinder adjustment key only when the coffee grinder is in operation. Do not put any material other than coffee beans into the tank. Do not pour coffee ground and/or instant coffee into bean tank. NEVER use coffee beans that have been stored in a freezer.

When making a coffee, if the coffee flow is very slow (powder is too fine) press and turn the adjustment button, clockwise to set the grinder to a coarser setting.

When making a coffee, if the coffee flow is very fast and very light in colour (powder is too coarse), press and turn the adjustment button counter-clockwise to adjust the grinder to a finer setting.

Descaling

1. Pour descaling solution into the tank.
2. Fill the water tank with fresh water.
3. Press the descaling icon in the menu.
4. The descaling solution will be dispensed at intervals.
5. The machine will finish its descaling cycle.
6. Once the tank, take out the water tank and fill it with new fresh water.
7. The machine will start the rinse cycle.
8. Once the unit has finished the rinse cycle, it will return to standby mode.
Setting stand-by mode

You can select 30 minutes, 1 hour, 1.5 hour .... 24 hours.

Sound settings

After pressing the audio settings icon, you can turn sound on or off.

Display settings

After pressing the energy-saving icon, you can select power saving mode, semi-saving mode or disable energy saving mode.
Language settings

You can select your preferred language, or you can just use the icons.

Coffee counter

You can view a counter of the different varieties of coffee you have made with your coffee machine.

Factory Reset

The coffee machine comes preprogrammed with the recommended default factory settings. If you are selling the coffee machine or giving it away, we recommend you perform this reset so that the new owners can start fresh and customise the settings to suit their own needs.

Cleaning the Milk Frother

1. Insert the milk frother into the machine.
2. Place the milk hose into a cup of water and place another cup under the milk dispenser.
3. Press the milk icon to start cleaning.
4. At the end of the operation, empty the container and repeat these steps until the pipeline has been completely flushed out and cleaned of any old milk.
**Brew unit cleaning**

1. Open the right side door.
2. Remove the waste bin and dispose of the coffee dregs.
3. Remove the brew unit and rinse with warm water.
4. Insert the brew unit back into place and press until you hear a click to confirm it is locked back in place.
5. Replace the waste bin.

Troubleshooting

If in the event that the machine should fall to the ground and malfunction, you should immediately unplug the machine from power point. If a mechanical failure to the machine should occur, you should contact the Kogan customer service team for information regarding repairs, even if the unit is no longer under warranty.

Kogan.com does not assume any responsibility for damages or malfunctions caused to the coffee machine by customers that have not complied with operating instructions and for general care maintenance of their coffee machine.

If the coffee machine is faulty, immediately unplug the power cord and contact the Kogan customer service team.
