

3-in-1 Digital Luggage Scale Kit

KALUGSCLPWBA

Quick Start Guide

Product Specifications

Power Input: DC 5V/800mAh

Power Output: DC 5V/1000mAh

Battery Capacity: 2500mAh

Charging Time: 4-5 hours

Weight: 167g

Max Capacity: 50kg

Units: kg lb oz g

Torch Brightness: 60 lumens

Size: 153 x 35 x 38mm

Charging Methods

- **Computer connection**
Insert the USB cable into the DC-IN port on the luggage scale, then plug the other end into a USB port on your computer or powered USB hub.
- **Mobile phone adapters**
Insert the USB cable into the DC-IN port on the luggage scale, then plug the other end into a 5V USB power supply.

Indicators

The red LED will illuminate when the product is charging. Once the unit is fully charged, please disconnect the charging cable to prolong the life of your battery.

The blue LED will illuminate when the product is being used while charging. If the LED goes out during use, the battery is being drained quicker than it can charge. You will need to recharge it sufficiently prior to using it again.

Power On

Please hang the scale vertically, then press the POWER key. After one second, it will show a full display with 0.00kg or 0.00lb, and the scale is ready to weigh.

Note: if you are using a basket to weight items, please hang the basket from the scale prior to pressing the POWER key. This will tare the weight of the basket, which can then be filled with items to weigh.

Hold Function

Once the luggage is stable on the scale, the LCD will display "HOLD" and the data will be automatically memorized. To reset the scale back to 0.00, press the POWER button.

Weighing Steps

Once powered up, you can hang the items on the scale, the data will be memorized and the LCD will display "HOLD". Press the "ON/OFF" key to unlock the scale so that more items can be added. During weighing, if the total weight of the goods (including the container) exceeds the 50kg maximum weight, the scale will show "O-LD". You should remove the items immediately to avoid damage to the scale.

Unit Exchange

Press the UNIT key to choose between different weight measurements between kg, lb, oz. (1kg = 2.2lb = 35.3oz)

When the scale function is turned off, you can press the UNIT button to turn on the flashlight function. Press it again to turn the flashlight off.

Power Off

Hold the POWER button for 2 seconds to turn the scale off. If the scale is locked, press the POWER button to unlock it first, then hold the POWER button down for 2 seconds. If there has been no operations for 60 seconds, the scale will automatically power off.

Notes

- The product must be charged before use.
- Please keep the product dry. Rain or any other liquids will result in corrosion of the electrical components.
- Keep the product away from sources of heat.
- Please do not throw the scale. Avoid heavy impacts or rough use.
- Do not clean the scales with harsh detergents. Wipe it clean with a soft, dry cloth.
- If you have any issues using the scale, please contact the Kogan.com customer support team.
