| 9. Treble vol-       |                    |

## OPERATION

1. Connect input and output correctly per diagram.

Check wireless subwoofer transmission band switch "CH": soundbar and subwoofer should be matched, that is, when soundbar is set at "1", subwoofer should be set at "1" accordingly, otherwise there is no subwoofer output.

2. Power on:

2.1 Put both plugs of soundbar and subwoofer into AC power socket, switch on power of the soundbar and subwoofer, and standby indicator on soundbar is lighted and twinkle.

2.2 Press "STB" on soundbar front panel or on Remote Control. Soundbar and subwoofer enter into working status. Display screen will be "DVD". The default setting is "DVD" sound source input status. Subwoofer indicator light is on.

If you don't want to connect DVD, you can press "INPUT" key to select other input.

3. Music Playing:

3.1 Press "VOL+" and "VOL-" on front panel or on Remote Control to adjust the volume.

3.2 Press "SRS" on front panel or on Remote Control to turn on and turn off SRS status under music playing

3.3 Press "Bass +" or "Bass-" on Remote Control to adjust bass

3.4 Select "Optical" or "Coaxial" accordingly if the sound source is with digital output.
