

# ADJUSTABLE LAPTOP & TABLET STAND KASTNDLPTP

## QUICK START GUIDE

### Introduction

The adjustable laptop and tablet stand has joints that are measured in 15° increments.

To operate a joint, simply press the button and rotate the ring to the desired angle.

Once the button is pressed, the joints can be rotated, and the buttons will automatically pop-out once the joint has reached the next locking point.

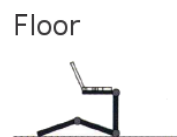

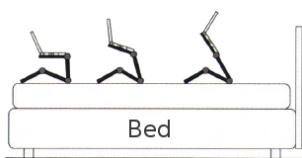

### Warning

Only use the adjustable laptop and tablet stand with all joints locked in place. When making adjustments, be wary of pinching your fingers and hands.

### Guidelines

- Maximum load is 6kg.
- Ensure that all joints are locked.
- Ensure that the platform is level.
- Ensure that the platform weight is centred over the bottom leg.

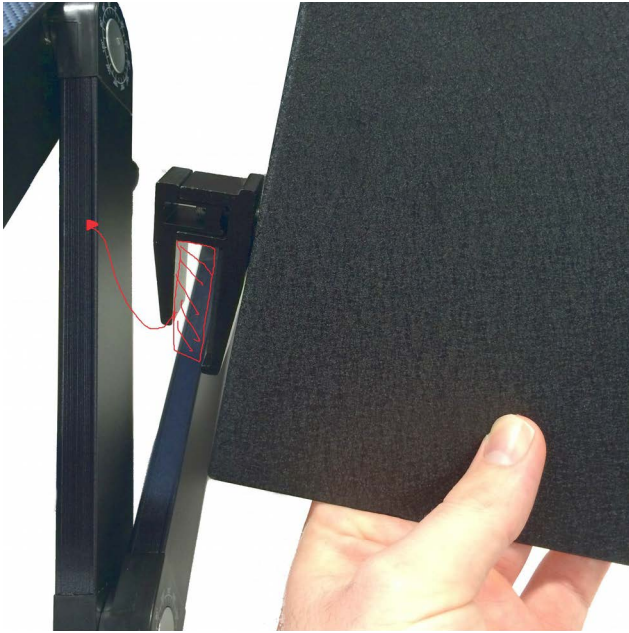

### Suggested Uses

### Disclaimer

The customer accepts full liability for any injury to themselves, or damage/loss that occurs from using this product. Please check the unit thoroughly yourself, including the locking mechanisms, prior to placing any electronics onto the stand.
