## Rechargeable Cordless LED Light/Torch KATRC25LEDA Quick Start Guide

### Technical Specifications

|                |   |
|----------------|---|
| Power Source   | 18650, 3.7V, 2,000mAh Rechargeable Li-Ion Battery |
| Number of LEDs | 25  |
| Rated LED Life | 50,000 hours                                      |
| Charger Input  | 240V AC 50Hz                                      |
| Charger Output | 5VDC 500mA  |
| Charging Time  | Approx 4 hours                                    |
| Discharge Time | Approx 4.5 hours                                  |

For the best performance from your batteries, we recommend you charge the batteries for 8-10 hours prior to first use.

Do not use or charge the light when the temperature is over 40C or under -20C.

### Charging Instructions

Turn the light off, then connect to the supplied charger.

The red indicator LED on the charger unit comes on when the charger is plugged in.

When the green LED indicator on the charger lights up, then the batteries are fully charged.

Normal charging will take 4 hours. The charger is safe to leave plugged in once fully charged as it will reduce the charge to a level that will maintain full charge. Unit will work for up to 4.5 hours once fully charged.

Unit is not waterproof. Do not use in the shower, sauna or other potentially wet location. Keep unit away from sinks, tubs, pools or any other body of liquid, as retrieving unit from water can be potentially fatal.

This unit is intended to be used for general indoor lighting and shop use. Do not use in a flammable or explosive atmosphere.

Do not look directly into the light during operation. This can be harmful to the eye, even for brief periods of time.
