

Kogan Men's Explorer Stainless Date Day 24-Hour 100m Watch KAWTCSSWHT Quick Start Guide

INTERFACE

3 Hands Time Setting

1. Pull the crown out to the 2nd position to stop the second hand reaching zero second.
2. Turn the crown to see the hour and minute hands. To ensure the time is set accurately, first turn the minute hand minutes ahead of desired time (into the future), and then wind it back counter-clockwise to the desired time. Check that AM/PM is correct by the 24 hour hand.
3. After setting the time, use a time signal to synchronize the watch by pressing the crown down to the normal position to start the second hand going.

Setting the Date (quick change function)

1. Pull the crown out to the 1st position.
2. Rotate the crown to set the date.
(Note: Please do not set the date during the period from 9pm to 3am, as the date will not change correctly.)

Setting the Day (NO quick change function)

1. Pull the crown out to the 2nd position.
2. Rotate the crown clockwise to turn the hour/minute hands to set a day. In order to set the day, you must advance the hour hand by 24 hours per day. The day itself will change somewhere between midnight and 5:30am or a little later.
