

KOMODO COLLAPSIBLE SOLAR LANTERN

KDCLPSOLNTA

COMPONENTS

- Komodo Collapsible Solar Lantern (x1)
- USB cable (x1)
- Suction cups (x2)
- User Guide (x1)

OPERATION

Using the Lantern

The Komodo Collapsible Solar Lantern is easy to prepare, simply pull on the handle while holding the base to expand it, and push down to collapse.

Press the power button at the centre of the top to turn on the lantern. The three levels of brightness can be cycled through by pressing this button again. To turn the lantern off, simply press the button once more after level 3.

Mounting or Hanging

Included are two suction cups to help attach the lantern to windows using the holes on the base of the lantern. Otherwise, the handle is perfect for hanging in tents or from any hooks.

Charging

Solar: The top of the lantern is a 0.3W solar panel, and it takes 10 hours to fully charge in sunlight. For optimal charging, ensure the lantern is positioned with direct sunlight and not in shade.

USB: The lantern can also be charged directly via the micro USB port on the side. Simply connect to a 5V USB adaptor or a USB port with charging capabilities using the supplied Micro-USB to USB cable to charge the device. 1 hour of 5V power is enough to fully charge the lantern via USB.

Please note: All images in this user guide are for reference only. Colours and design may differ to the final product.
