

KOMODO

Rechargeable LED Spotlight

KDSPTRCLITA

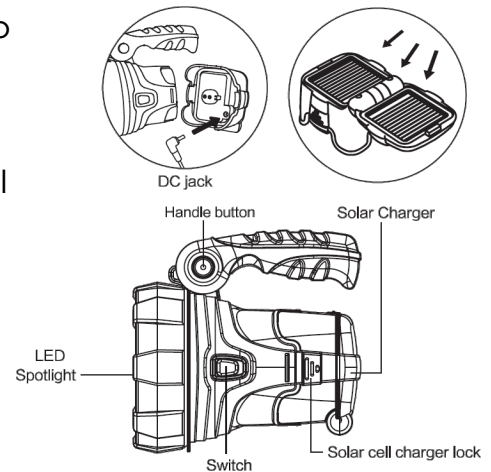

Quick Start Guide

PRODUCT FUNCTIONS & FEATURES

- Battery life of more than 300 charging cycles.
- Environmentally friendly solar charger.
- Battery life of approximately 3 hours per charge.

PRODUCT OPERATIONS

- Fully charge the product for 10 hours prior to first use.
- To charge the unit, please plug the cord into your 12V power output of your car and leave it plugged in while you drive. The battery will slowly charge while you are using the car. The **RED LED** light will illuminate to indicate that the battery is charging. The **GREEN LED** light will illuminate to indicate that the battery is charged.
- Press the switch once to turn on the torch. Press a second time to turn off the power.
- For solar charging, remove and open the detachable solar cell charger and place it in the sun to charge.
- Designed with an ergonomic rotary handle for alternative grip modes.

CAUTION

- Do not shine torch directly into eyes.
- Let the unit cool down fully before storing.
- To avoid the risk of electric shock, unplug the unit before cleaning.
- Only use replacement parts from Kogan.
- Please do not use or store this product close to fires or heaters. High temperatures may cause an explosion or combustion.
- Do not attempt to use chargers from other devices. Only use the charger provided by Kogan.

To ensure the battery life, please charge the battery fully every few months, even if the torch is not being used.

When the torch light goes dim during use, that means the energy will soon be exhausted. In order to protect the battery, please stop use and charge it as soon as possible. Do not keep unit running until the torch light goes fully out, as this may cause damage to the battery.
