

Packing up your POP-UP tent.

Before packing up, ensure the tent is completely empty. Leave the front flap open so that air can escape during the pack up.

- 1 Stand facing the tent side-on. With your LEFT hand, grab the bottom loop on the left end and lift it up until it meets the top loop (top of the tent roof loop).

Then grab the bottom loop on the right end of the tent with your RIGHT hand and lift it up until it meets the top loop.

- 2 Bring both hands together, bringing the edges in to the center. Keep the edges clamped like this with your RIGHT hand until step 5.

- 3 Lift the tent and rotate it so that the tent is now placed vertically on one end.

- 4 With your LEFT hand, grab the top 2 loops and slowly lower and fold the top loops inwards, bringing them down to ground level.

- 5 Loosen the grip on the loops you were holding from step 2 and allow them to separate so you can fold one section over the other section.

- 6 Pull on the edges and arrange until you have created three uniform rings. While holding them in this position with one hand, try to push all extra air out of the tent.

- 7 The rings should all be lying neatly on top of each other. Tuck all loose tent material back into the rings and expel all air.

- 8 Once the rings are aligned, carefully put the tent into the storage bag.
