

PPTYPATCHLA Portable Potty Pad

- Ideal as a training tool for your puppy or assisting an older dog that might be unable to go to the bathroom outside
- Made of convincing, synthetic and non-toxic grass material
- Weather proof can be left outside on the verandah/balcony

Use

The base tray holds the grid tray with the grass mat placed on top. When your dog goes to the bathroom, the urine goes through the grass mat and through the holes in the grid tray to the bottom of the base tray. The pegs on surface of the grid tray and the raised platform of the base tray elevate the grass mat, keeping it away from the urine.

Cleaning

IMPORTANT: Do NOT place grass mat in washing machine or dryer.

NOTE: After a couple of uses, you may notice fraying at the edges of the mat. This is normal and will not damage the product or affect its utility.

For urine:

- 1) Remove the grass mat and grid tray from the base tray. Dispose the contents of base tray in the toilet.
- 2) Use warm soapy water to clean grass mat, grid and base trays. Use mild, preferably unscented soap. Squeeze excess water from the grass mat and let it drip dry: do not wring or twist.
- 3) As your dog is getting used to the mat, remember to always place it back in the same spot.

For solid waste:

- 1) Remove and dispose of the solid waste.
- 2) Use warm soapy water to spot clean the grass mat. Use mild, preferably unscented soap.
- 3) If needed, clean all parts by washing grass mat, grid and base trays in warm soapy water. Use mild, preferably unscented soap. Squeeze excess water from the grass mat and let it drip dry: do not wring or twist.
- 4) As your dog is getting used to the mat, remember to always place it back in the same spot.
