6. Supports dual standby
7. Supports mobile phone width between 58-100mm
8. USB Max. output: 2A

Operation:

Preparation:
1. Installation
Plug car charger into cigarette lighter and connect car charger and the device by USB cable. Install the device in the proper position for the type of vehicle and your driving habits, such as to the dashboard or front window, and then fasten it securely.

2. Charging mobile phone with the USB cable
To charge your mobile phone, plug the short USB cable into the USB port of the device, then connect the other end of the cable to the charging port of the mobile phone.

3. Pairing
When use the device for the first time, press and hold the paring button for 3 seconds then release. Red and blue indicator lights flash sequentially indicating the device is in paring mode. Open Bluetooth on your mobile phone and search for and select BT-8112. Blue indicator
light flashes to indicate phone has paired successfully.

4. **Pairing a second phone**

When pairing a second mobile phone (same steps as 3), press and hold the pairing button for 3 seconds then release. Red and blue indicator lights flash sequentially indicating the device is in pairing mode. Open Bluetooth on your mobile phone and search for and select BT-8112. Blue indicator light flashes to indicate phone has paired successfully.

**Note:** When pairing the second phone, the first phone will disconnect. After short time the first phone will automatically reconnect.

**Using the product:**

Put your phone in the holder and turn on the functions you want: GPS Navigator, music player etc. When you start your car the unit will turn on automatically. You can enjoy your journey with your phone connected.

When you arrive at your destination take out your mobile phone from phone holder and the BT8112 will automatically shut down six minutes after leaving Bluetooth range of the mobile phone.

**Notice:**

1. The BT8112 has no built-in battery, so power needs to be supplied by an external USB cable. When using the Bluetooth function for the first time, you need to long press the pairing button for 3 seconds to pair. (Long press 3 seconds then release, the device will enter pairing mode automatically).

2. It is normal for the phone to disconnect with the device when the micro USB cable disconnects causing power loss. When power is reconnected, it pairs again automatically.

3. Voice prompt switch: This device supports voice prompts in three languages: Chinese, English and Spanish. The factory default is English. If you want to switch to other languages, pressing the pairing button twice will broadcast voice prompts of various languages in turns. When you hear Chinese prompted, press the pairing button to confirm and select Chinese. When you hear Spanish prompted, shortly press pairing button to confirm and select Spanish. The selected language will be stored.
