WARNINGS

- Incorrect usage may lead to injuries or damage to property. Please take care when using this device.
- Keep long hair and loose clothing well away from the shredder.
- Keep your hands well away from the blade.
- This shredder is not to be used by children. Keep them well away from the unit at all times.
- Please do not use near flammable gases or liquids.

Usage

1. Connect the shredder to the power source, then turn the power switch to the "ON/AUTO" position. The shredder is now in standby mode.
2. Insert paper, credit cards or CDs into the relevant insertion slot. The shredder will automatically start working, then will return to standby mode when the shredding process is complete.
3. During the shredding process, if the unit needs to be stopped urgently, the user can turn the switch to the "REV" position. The shredder will roll out the un-shredded portion immediately.
   (Please note: A partially shredded CD or credit card may be rendered completely unreadable.)
4. If the paper being shredded is comparatively wet or with long fibre contents, the blades may get jammed, which will affect the shredding efficiency. If this occurs, switch the blades forwards and reverse by sliding the switch between "ON/AUTO" and "REV" two or three times, which should remove anything jamming up the blades.

Paper Jam and Overload Protection

1. If the unit is overloaded while shredding, the shredding speed may be slowed or even stop. In this event, you should switch to "REV" and reduce the amount of paper being shredded at a single time.
2. For continuous shredding in large quantity, it is recommended to not feed over 10 sheets of paper each time, and after two minutes of continuous use, allow a 30 second break to give the motor some time to cool down.
3. If the shredded is jammed for a long period or the motor temperature gets too high, the power will be cut for protection. In this case, turn the unit off completely for a short time, then turn the switch to "AUTO". The shredded will resume into standby mode.
4. Due to inbuilt safety protections, the shredder cannot start up normally if the head is moved away from the paper basket or is not positioned correctly over the basket.
Safety Instructions

1. Please locate the shredder at a location close to a power socket for quick power disconnection in the event of an emergency.
2. Please be aware of the safety alert on the cover of the shredder, to ensure safety from getting long hair, ties, jewellery or other items of loose clothing being caught and pulled into the shredder.
3. Please never place non-paper goods such as paperclips, plastic bags or cloth into the shredder, as this may cause damage and lower the shredding performance.
4. While cleaning the shredder or cleaning out the paper basket, please turn the switch to "OFF" and unplug the unit from the power supply. The basket will need to be emptied regularly.
5. In order to ensure long life and good performance, please do not run the shredder in extremely hot or humid environments for extended periods of time.
6. Do not alter the internal structure of the paper shredder or power cable in any manner yourself. Do not use the shredder if the body or power cable has been damaged in any way. Please contact the Kogan.com customer support team for information.
7. Please keep the shredder away from children and pets.
